

Life Ledger integration has been added so Evolution FMS. At the click of a button a death notification can now be created on the Life Ledger platform.

“Life Ledger is a free, easy-to-use death notification service that allows families to tell over 900 companies, ranging from banks and utilities to insurers and social media, in the UK about the death of a loved one, from one place.”

To enable the integration please navigate to **Administration, Integration** and ensure the Enabled toggle is also switched on.

ADMINISTRATION - PROVIDER API INTEGRATION

Please select a dataset: Default

Options	Type	Provider	Username	Password	Enabled
	Donation	None	Edit to view or change	Edit to view or change	<input type="checkbox"/>
	Finance	None	Edit to view or change	Edit to view or change	<input type="checkbox"/>
	Death Notification	Life Ledger			<input checked="" type="checkbox"/>

To send a request for Life Ledger to process a death notification, open a funeral record, and navigate to the Deceased page. Press the Bell icon next to Life Ledger and the system will transmit the relevant data to the Life Ledger platform and the bell will turn yellow.
